

Cultivating Resources for Salt Lake City's Public Schools

April 2, 2020

Dear Principals,

To help meet the enormous needs of our students and their families during the COVID-19 pandemic, the Salt Lake Education Foundation and Salt Lake City School District are working with community partners to provide emergency "grab and go" food bags and hygiene kits for families.

The foundation is committed to the health and safety of our students. Of particular concern at this time is protecting our students and their families against respiratory illnesses and ensuring that they have access to healthy food. We are working with our community to package food bags and emergency hygiene kits for families in need.

Families who need clothing or household goods should have a counselor request a DI voucher through the [normal link](#). Please make sure the address of where the voucher should be sent and a phone number at which the family can be reached is entered into the note section.

We are aware these services are not completely meeting all the needs of our families during the COVID-19 school dismissal. **If you have families with other needs, please have them call the Family Support Hotline at 801.301.6476, Monday through Friday between 8:00 a.m. and 5:00 p.m. or [complete this online form](#).**

The foundation is able to provide the following support:

- Food and household supplies
- Hygiene items
- Bishops' Storehouse and DI vouchers
- Gift cards
- UTA passes

For computer issues, IT technicians are available Monday through Friday between 9:00 a.m. and 2:00 p.m. at Rose Park Elementary, Mountain View Elementary, Liberty Elementary, East High School and Hillside Middle School to exchange and repair laptops.

Thank you for all you are doing for your students.

Sincerely,

James E. Yapias
Foundation Director
